Heat Press Settings Log Template

Record material, blank, transfer, actual settings and wash-test results without invented universal temperatures.

Test identity and materials

Test / parent test	Blank / transfer / press	Date / source instructions

Actual settings and observations

Test ID	Temperature / unit	Time / unit	Pressure / peel	Result

Follow-up wash observations

Test ID	Date	Wash conditions	Cycles	Observed result

Follow the material, transfer and equipment manufacturer instructions. Record your actual settings; this sheet supplies no recommended temperature.
