Heat Press Settings Log Template

Record material, blank, transfer, actual settings and wash-test results without invented universal temperatures.

DEMONSTRATION DATA - NOT AN APP EXPORT

Test identity and materials

Test / parent test	Blank / transfer / press	Date / source instructions
DEMO-T1 / none	Demo fabric A / transfer B / press C	2026-10-01 / actual manufacturer instructions
DEMO-T2 / DEMO-T1	Same blank / transfer / press	2026-10-02 / same instructions

Actual settings and observations

Test ID	Temperature / unit	Time / unit	Pressure / peel	Result
DEMO-T1	155 C (illustrative)	12 seconds	Machine setting 3 / cool	Edge lifted
DEMO-T2	155 C (illustrative)	15 seconds	Machine setting 3 / cool	Initial edge intact

Follow-up wash observations

Test ID	Date	Wash conditions	Cycles	Observed result
DEMO-T1	2026-10-07	Demo gentle cycle, air dry	1	Edge lift retained
DEMO-T2	2026-10-07	Same demo cycle, air dry	1	No visible edge lift observed

Follow the material, transfer and equipment manufacturer instructions. Record your actual settings; this sheet supplies no recommended temperature.
